DETAILED ACTION

As a courtesy to the applicant, the following suggestions are pointed out in order to advise the applicant to make the following corrections in the drawings and specifications:

Drawings

Reference character 12 refers to both circumferential angular positioning device (claim 1 line 7) and webs (page 7 line 4). Furthermore, reference characters 9 and 11 stated in claim 1 and reference character 19' as depicted in claim 2 are not shown in the drawings. It is suggested for the applicant to address these errors.

Specification

On page 6 of the specification where a brief description of the drawings are given, there must be a description for figure 1 in the drawings must be listed. If such description is not listed, the specification will be objectionable. Furthermore, a plurality of typos exist in the specification (page 7, lines 13 and 18) that the applicant is advised to address.

Claims

In claim 2, the dependence of the claim as depicted by "claim (1)" is incorrect. It must be corrected to state "claim 1" if claim dependency is designated. Reference item 12 in the claims are referred to through a plurality of descriptions (i.e. support device, circumferential angular positioning device, fixed webs, webs) which may render the claims objectionable.

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1. The species are as follows:

Species I) Fig. 2 and species II) Fig. 6. Additionally, species I contains the following subspecies: A) Fig. 3, B) Fig. 3a, C) Fig. 4, and D) Fig. 5. Furthermore, species II contains the following subspecies: E) Fig. 7 and F) Fig. 8.

Applicant is required, in reply to this action, to elect a single disclosed species (either species I or II) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. If the applicant elects species I, the applicant must also elect a single corresponding subspecies A, B, C, or D. If the applicant elects species II, then the applicant must also elect a single corresponding subspecies E or F. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3709

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Species I: Claims 1, 2-8

Species II: Claims 1, 2-5, 8, and 9

Subspecies B is not claimed

The following claim(s) are generic: claim 1.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the special technical feature claimed to be a support device 60 and 62 as depicted by Widran US 3,900,022 is common in the art and therefore is considered to be a common technical feature. As a result, this application entails species and subspecies.

A telephone call was made to David Spaw on June 27, 2007 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alireza Nia whose telephone number is 571-270-3076. The examiner can normally be reached on Mo.-Fri.-7:30 AM-5:00 PM EST-Alternate Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenburg can be reached on 571-272-4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published

Art Unit: 3709

applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
